Senior Site Reliability Engineer with 20 years of experience. Expert in SRE methodologies, Release Management, Platform Migrations, and Cloud Engineering, specializing in managing high-scale, distributed systems (e.g., Kubernetes, Linux). Proficient in Java, Python, and Go. Demonstrates a strong blend of technical acumen, leadership, and problem-solving skills. Combines strong technical acumen with effective leadership and advanced problem-solving capabilities.

PROFESSIONAL EXPERIENCE

Senior Site Reliability Engineer

Apple Inc

Cupertino, CA

August 2017 to Current

- **Site Reliability Engineering (SRE):**

- Core member of the Apple Maps Data SRE team, serving as SRE DRI for mission-critical platforms including Places (20+ microservices), Base Map (300+ microservices), BusinessConnect (20+ microservices), and the Apache Solr Platform, owning availability, performance, and incident response end-to-end.
- Architected the Release Management system for Apple Maps Data Ecosystem, supporting 300+ microservices.
- Built and operationalized the Kubernetes platform for the Apple Maps Places organization, significantly reducing hardware footprint and improving deployment turnaround time.
- Developed and implemented complete CI/CD pipelines, leveraging Helm chart creation with Arches and utilizing Spinnaker for Kubernetes (K8s) deployments.
- Expert in troubleshooting large-scale data systems and cloud-based microservices, focused on minimizing Mean Time To Resolution (MTTR).
- Built comprehensive observability and alerting using Splunk, Hubble, Prometheus, and Grafana, providing request-level tracing, SLA visibility, and faster root-cause analysis.
- Contributed to developing a Langgraph-based AI agent for automated pager response and resolution, leveraging a comprehensive Knowledge Graph and RAG-based sources for troubleshooting large-scale data systems.
- Previously a full-stack Java developer, with a current focus on diagnosing and resolving performance issues in Java-based microservices utilizing JFR, heap & thread analysis
- Maintained 12x7 on-call rotation.

- **Technical Leadership:**

- Manages a distributed team of 6 engineers across multiple time zones, overseeing operations planning and conducting daily standup meetings.
- Team Lead for the Apache Solr Platform offering(35+ clusters) for Apple Maps.managing 3.5 Petabytes of data for Apple Maps."

DevOps Engineer/Java Developer

State Street IMS
Irvine, CA

March 2011 – August 2017

- Build and Deployment Automation: Authored diverse build scripts in Bash, ANT, and Windows batch, facilitating the build and deployment of a broad technology stack including Java, Glassfish, Websphere, Tomcat, C++, VB, PowerBuilder, and COBOL
- Java-based Build and Dependency Tool: Developed and maintained Java-based tools for build and dependency management, enhancing efficiency and reliability in software development processes
- Release Management and Validation: Oversaw monthly application production releases and conduct post-release validations. Maintained nightly build processes, ensuring consistency and quality in software deployment
- Jenkins Continuous Integration Setup: Established the first Jenkins CI server, advancing software development and deployment practices
- Database Migration Leadership: Successfully executed an ETL (Export, Transform, Load) process for data migration from Sybase to Oracle using Talend Open Studio v 4.1.2, showcasing proficiency in database management and migration techniques

Java Developer/Technical Lead

Wellpoint Anthem
Woodland Hills, CA

July 2010 – March 2011

- Java Web Services Development: Developed Java-based web services for the WellPoint Online Store, significantly improving the accessibility and functionality of healthcare plan selections
- Technical Design and Documentation: Prepared comprehensive technical design documents, including UML designs, database design, and web service architecture, ensuring clarity and coherence in software development
- Pharmacy Website Tool Enhancement: Enhanced the administrative tool for WellPoint's pharmacy website, optimizing backend processes and user interface capabilities
- Java Development and Testing: Handled Java coding, unit testing, and provided support for production deployments, ensuring robust and error-free software delivery.
- Database Management: Authored Spring batch jobs for database refresh activities, streamlining data management processes

EDUCATION

Master of Business Administration(MBA), Information Systems (GPA 3.7)

California State University, Fullerton, CA | 2017

Bachelor of Technology Electrical & Electronics Engineering (GPA 3.5)

University of Calicut, India | 2006

TECHNICAL SKILLS

- Kubernetes Cloud migration
- Offering Apache Solr as a platform
- Java, Python and Go programming, scripting in Bash
- Experienced with Large Language Models (LLMs)
- Manage large-scale, distributed systems from inception to operation
- Implement robust monitoring solutions to track system health, availability, throughput, latency, correctness and network issues.
- Conducting blameless post-mortems
- Proven expertise in serving as an incident commander.

AI Agent	Langgraph, Langchain. Heavy user of LLMs
Containerization / Cloud	Docker, Kubernetes (On premise), AWS
Monitoring and Logging	Splunk, ELK stack(Elasticsearch, Kibana, Logstash), Log4j, Grafana, OpenTelemetry
Scripting and Coding	Java 17, Python 3, GoLang, Bash Shell scripting, Windows CMD shell, OOP principles
Frontend technologies	JSP, JSF, HTML, Java Script
Build tools	Gradle, Ant, Maven
CI/CD	Jenkins, Spinnaker, Helm
IDE –Tools	Intellij Ultimate, IBM Rational Application Developer 6.0 , IBM Rational Software Architect 7.5, Eclipse
Configuration management	Git, IBM Clearcase, CVS, SVN, PVCS, Puppet, Ansible, Chef
Infrastructure Automation	Puppet, Ansible, Chef et al
Servers	Apache Jetty, Glassfish, Tomcat.
Databases az	Postgres, My SQL
Search & Indexing	Apache Solr8 cluster administration
ETL	Talend Open Studio
Caching	Redis
Operating System	Linux administration (CentOS, OEL other Linux flavors), UNIX
Testing	Siege, JUNIT, SOAP ui.
Networking	Standard networking protocols and components such as HTTP, DNS, TCP/IP, ICMP, the OSI Model, Subnetting and Load Balancing strategies
Troubleshooting	Java memory tuning, application log analysis, JFR, SSL/TLS, networking, latency et al
General	UML, OmniGraffle, Keynote
