---

Senior Site Reliability Engineer with 20 years of experience in SRE methodologies, Release Management, Platform Migrations, and Cloud Engineering, including 8+ years operating bare-metal, on-premise data center infrastructure for highly low-latency, high-throughput production environments. Specialized in managing high-scale, distributed systems on Kubernetes and Linux, with deep expertise in Linux performance tuning, networking (DNS/TCP/TLS), and Kubernetes internals. Proficient in Java, Python, and Go. Demonstrates a proven blend of technical leadership, incident management, and problem-solving capabilities across large-scale production environments.

## PROFESSIONAL EXPERIENCE

---

### Production Engineer — Meta Platforms

March 2026 – Present • Remote

- Provide Production Engineering (PE) and Site Reliability Engineering (SRE) support to the Content Integrity team, ensuring stability and performance of large data pipelines and compute infrastructure.
- Manage reliability and operational health of high-scale distributed systems, applying SRE best practices to improve availability, latency, and incident response.

### Senior Site Reliability Engineer — Apple Inc.

August 2017 – March 2026 • Cupertino, CA

- Served as SRE DRI for mission-critical Apple Maps Data platforms including Places (20+ microservices), Base Map (300+ microservices), BusinessConnect, and the Apache Solr Platform; owned end-to-end availability, performance, and incident response.
- Architected the Release Management system for the Apple Maps Data Ecosystem supporting 300+ microservices, and built the Kubernetes platform for the Apple Maps Places organization, significantly reducing hardware footprint and improving deployment turnaround times.
- Developed complete CI/CD pipelines leveraging Helm, Arches, and Spinnaker for Kubernetes deployments; built comprehensive observability and alerting using Splunk, Prometheus, and Grafana, enabling request-level tracing, SLA visibility, and faster root-cause analysis.
- Contributed to developing a LangGraph-based AI agent for automated pager response and resolution, leveraging a comprehensive Knowledge Graph and RAG-based sources to troubleshoot large-scale data systems autonomously.
- Led the Apache Solr Platform (35+ clusters) managing 3.5 Petabytes of data for Apple Maps; diagnosed and resolved Java-based microservice performance issues using JFR, heap and thread analysis; maintained 12x7 on-call rotation.
- Managed a distributed team of 6 engineers across multiple time zones, overseeing operations planning, daily standups, and technical mentorship; served as incident commander for high-severity production events.

### DevOps Engineer / Java Developer — State Street IMS

March 2011 – August 2017 • Irvine, CA

- Authored build and deployment automation scripts in Bash, ANT, and Windows batch, supporting a broad technology stack including Java, Glassfish, WebSphere, Tomcat, C++, VB, PowerBuilder, and COBOL.
- Established the first Jenkins CI server, advancing software development and deployment practices; developed and maintained Java-based build and dependency management tools to enhance efficiency and reliability.
- Oversaw monthly production application releases and post-release validations; executed ETL data migration from Sybase to Oracle using Talend Open Studio v4.1.2.

### Java Developer / Technical Lead — WellPoint Anthem

July 2010 – March 2011 • Woodland Hills, CA

- Developed Java web services for the WellPoint Online Store, improving healthcare plan accessibility; produced UML-based technical design documents and authored Spring batch jobs for database refresh activities.

EDUCATION

**Master of Business Administration (MBA) — Information Systems**  
California State University, Fullerton, CA | Graduated 2017

**Bachelor of Technology — Electrical & Electronics Engineering**  
University of Calicut, India | Graduated 2006

GPA: 3.7 / 4.0

GPA: 3.5 / 4.0

TECHNICAL SKILLS

|                       |                                                                                                      |
|-----------------------|------------------------------------------------------------------------------------------------------|
| AI / LLM              | LangGraph, LangChain; AI agent development using RAG and Knowledge Graph sources; heavy user of LLMs |
| Cloud & Containers    | Kubernetes (on-premise), Docker, AWS                                                                 |
| Programming Languages | Java 17, Python 3, Go (Golang), Bash scripting, Windows CMD shell                                    |
| CI/CD & Build         | Jenkins, Spinnaker, Helm, Gradle, Maven, Ant                                                         |
| Monitoring & Logging  | Splunk, ELK Stack (Elasticsearch, Logstash, Kibana), Prometheus, Grafana, OpenTelemetry, Log4j       |
| Config & Infra Mgmt   | Git, Puppet, Ansible, Chef, IBM ClearCase, SVN, CVS, PVCS                                            |
| Databases & Search    | PostgreSQL, MySQL, Apache Solr 8 (cluster administration), Redis                                     |
| Operating Systems     | Linux administration (CentOS, OEL, other Linux flavors), UNIX                                        |
| Networking & Security | HTTP/S, DNS, TCP/IP, ICMP, OSI Model, Subnetting, Load Balancing, SSL/TLS                            |
| Troubleshooting       | Java memory tuning, JFR, heap & thread analysis, application log analysis, network latency           |
| Servers & ETL         | Apache Jetty, Glassfish, Tomcat; Talend Open Studio (ETL)                                            |
| Testing & Performance | Siege, JUnit, SoapUI                                                                                 |

KEY COMPETENCIES

Site Reliability Engineering (SRE) • Kubernetes Platform Engineering • CI/CD Pipeline Development • Release Management • Incident Command & Response • Distributed Systems • Observability & Alerting • AI Agent Development (LangGraph/RAG) • Java Performance Tuning • Team Leadership & Cross-functional Collaboration • Post-mortem & RCA Facilitation • Cloud Migration
